

## **AMENDMENT(S) TO THE SPECIFICATION**

**Please replace the paragraph beginning at page 1, line 15, with the following rewritten paragraph:**

In addition, there are many other tape-like products, such as adhesive note pads, labeling tapes (such as so-called tape flags) and tapes similar to the so-called “Post-it Notes”, which are in wide use for posting messages and as reminder notes.

**Please insert the following paragraph after page 4, line 13:**

Figure 4(a): A double-sided embodiment of an adhesive note pad.

**Please replace the paragraph beginning at page 5, line 21, with the following rewritten paragraph:**

Alternatively, dotted, wavy or checkered patterns, for example, can be created in the adhesive sections of the tapes. This will not only maintain the strength of the tapes, but also greatly decrease the consumption of adhesive. Moreover, this will enable the manufacture of strong double-sided tapes even without using an additional lining.

**Please replace the paragraph beginning at page 7, line 23, with the following rewritten paragraph:**

Figure 4 relates to Embodiment 3. Figure 4(a) shows a double-sided embodiment. Embodiment 3 is an adhesive note pad (30). In Embodiment 3, the adhesive (60) and non-adhesive (61) sections form a stripe or wave pattern or, if desired, a dot pattern, which repeats more than two times where needed, namely, in the upper section, in a corner or on the front and reverse side of adhesive note pad (30), for example.
